

Real Time Information Systems Ltd

The RTIS Approach

“At RTIS we expect our software to fit your business, not the other way around”.

We offer a set of existing modules as templates, but can also offer bespoke development on the premise that your business does not run exactly the same as others.

Key Features

- Quick configured solutions based around existing modules
- Additional bespoke development when required
- Communication with shop floor machinery and bar-coding
- Experienced in translating business operations into software solutions
- On-going support if required
- Can integrate with existing IT, including accounts packages

Manufacturing Modules

- Estimating/Quoting
- Product Specification
- Sales Order Processing
- Costing
- Materials Requirements
- Purchasing
- Stock control
- Production & Shop Floor systems
- Planning/Forecasting and
- Scheduling
- Dispatch
- Bar-coding

Other Modules

- Contact Management
- Project Tracking
- Credit Control
- Time & Attendance
- Resource Management
- Vehicle Mileage Administration

General Modules

- Workflow and automation
- Decision Support
- Management Reporting and Control

INTEGRATION: although we can provide comprehensive integrated solutions, often we work within existing systems, perhaps providing a departmental solution within a large corporate. We can link into existing database platforms so that, where appropriate, data can be shared or passed to and fro. Where needed, we can offer dual running of legacy and new RTIS systems.

RTIS can demonstrate a successful track record and reference sites. Ask to see a demonstration.
